Project Overview*

TrackFit is a modern fitness tracking mobile app designed to help users stay consistent, motivated, and on top of their daily goals. From step counts to calorie insights and workout plans, TrackFit offers a seamless and visually engaging fitness journey.

“Build a smart fitness companion app that personalizes workouts, tracks progress in real time, and fosters a motivational space for goal-driven users.”

Esther Howard

Founder & CEO TrackFit

Logo Design*

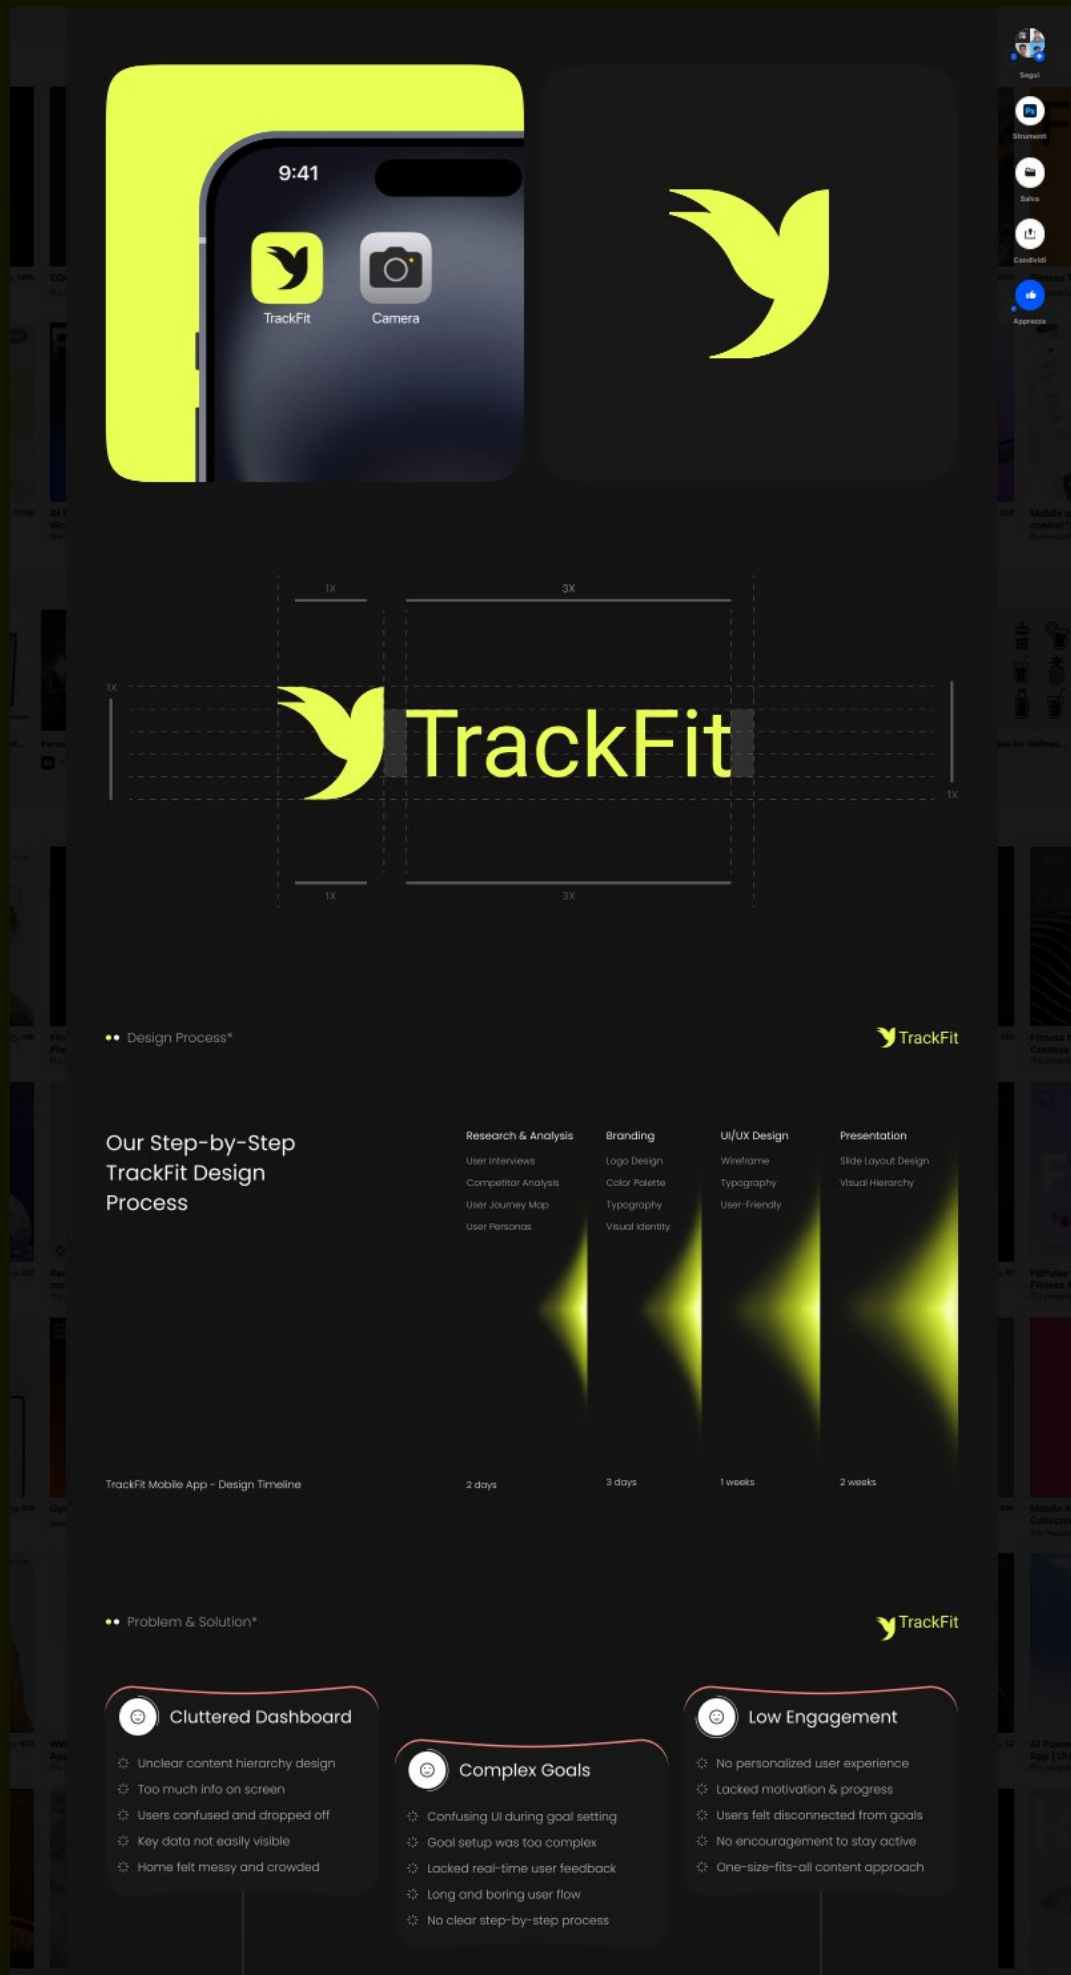

TrackFit's primary purpose is to use smart technology to simplify fitness tracking, goal setting, and progress monitoring for users, taking into account their activity levels and personal goals. It aims to save users' time, keep them motivated, and improve their overall health through personalized fitness insights and daily progress updates.
